

Recover Costs On Your Used and Surplus Communication Equipment

Turn Excess Equipment In To New Revenue

Whether through mergers, technology migration, or data center consolidation, every company eventually meets the same challenge. What do you do with excess communication equipment? American Communications buys used and surplus equipment and sells it for high market value. This helps you recoup on the original costs, expands your budget, and provides you unforeseen funds to purchase new equipment.

Why Choose American Communications For Asset Recovery?

- **Savings** – With our client relationships throughout the industry, including contacts in Asia, Europe, and Latin America, we have the contacts to offer you the highest possible market value for your equipment.
- **Consignment Programs** – We will clean, test and repair your equipment and prepare it for resale. We will then actively work on your behalf to sell your equipment through our network of end-users and resellers, focusing in on those who will pay top dollar for your equipment.
- **Trade-in Programs** – American Communications provides you the option to trade-in used equipment and receive credit towards purchases of new equipment directly from the manufacturer.
- **Stress-free Process** – With equipment assessment and de-installation services available, American Communications takes the bother and risk out of asset recovery.
- **Maximizing Equipment Space** – Avoid cluttering your equipment space and avoid costly storage of unused inventory.
- **Environmental Disposal** – Assets with little or no market value, American Communications can dispose of them in compliance with U.S. state laws and E.U. directives.

A Turnkey Solution

Large Cash Reserve for Purchases

Wide Range of Products Accepted

Highest Possible Market Value

We make asset recovery easy

We Handle All Logistics For You

Valuation

Our team will evaluate the remarkatability of the equipment and assess current market value for each piece, so you'll know you'll be receiving the best value for your used equipment.

De-Installation

Our Network Installation Experts will properly de-install your equipment, package it, and ship it to our warehouse for storage.

Sorting

We'll segment your equipment by product and manufacturer using bar code scanner technology integrated with a customized CLEI database to ensure each piece of your equipment is recorded properly.

Testing

Our team of technicians will inspect each piece of equipment thoroughly. If a piece of equipment needs repair, we'll provide the resources and technology to guarantee each piece is ready to be sold.

Warehousing

We can store your equipment in one of our expansive warehouses located around the country until your equipment is sold so you can save on storage costs and avoid cluttering your equipment floor.

Repackaging

If your equipment does not come with original packaging, our team will prepare the equipment for shipment with durable packing materials to ensure equipment is protected during shipping to the end purchaser.

Marketing

The American Communications sales team will work on your behalf, using connections around the country and abroad, to sell your equipment for the highest possible market value.

About American Communications
